Stealthy Fighter-Like Wingman Drone Concept Unveiled By Airbus

The sleek, tailless, canard-equipped design looks to be optimized for high performance while retaining significant low-observable qualities.

Israel examines M61 Vulcan for countering drones

Israel is examining the M61 Vulcan cannon to counter drones. The weapon would go atop armored personnel carriers deployed along the northern border.

NATO finanziert Roboter des deutschen Start Up ARX Robotics

Die NATO beteiligt sich an der Seed-Finanzierung von ARX Robotics, um die Lücke bei militärischen unbemannten Bodensystemen in den Streitkräften der Alliierten zu schließen.

MUST READ! - UKRAINE Special

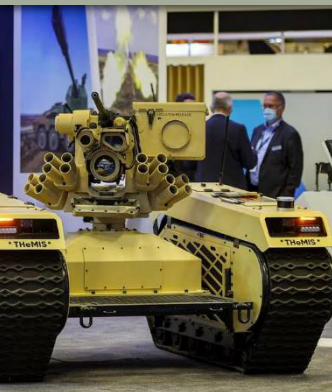

Russia Is Testing A First Person View Remote Controlled Tank Conversion In Ukraine

Russia converted a captured Ukrainian tank into a remote controlled vehicle that uses a similar FPV control concept as many kamikaze drones. Such remote controlled tanks could be used in mine-clearing operations, or as a crude 'first-person view' (FPV) tank.

Estonian-made combat robots in Ukraine now come with Starlink

Estonian-made THEMIS unmanned ground vehicles operating in Ukraine will feature Starlink satellite connectivity, enabling their operation from thousands of kilometers away, the robot manufacturer announced on Wednesday.
